User Story
- As a DIYer, I want to be able to get an estimate on my small DIY projects so that i can know if the project is within my budget
- As a DIYer, I want to be able to gauge the difficulty of my DIY projects so that i can determine if the project is doable with my level of expertise.
- As a DIYer, I want to be able to make simple choices about my projects so that I can save energy for my home.
- As a DIYer, I want to be able to measure and monitor my energy consumption so that I can
- As a DIYer, I want a product that will help me save money on my projects.
- As a User, I want to be able to backup my data, besides the Cloud, so that I don't lose my work.
- As a User, I want to be able to use this application offline so that I can use it at work sites.
- As a Product seller, I want to be able to list my products on the app so that it can get exposure, provide details about my products and, ultimately, sell.
- As a User, I would like to be able to upload a picture of my electric meter so that my next bill can be estimated.
- As a Business Owner I would like a website where users can type in data and get a detailed analysis.
- As an Admin, I want to be able to list new products as options for DIY products so that the Users may get suggestions for their projects.
- As a DIYer, I want a suggestion for better alternative products so that I can further my savings and/or build a better project.
- As a User I would like a simple program that can export my data.
- As the Provider of the tool I would like a way to eventually provide updates for my users.
- As a Business Owner I want to forward data reports to contractors, energy audit professionals, retailers, and other programs used by professional energy companies.

Business Rule

There will be no cloud storage of user data.
